

CONTENTS TO VOLUME 291

NUMBER 1

Synthetic fluid inclusions. X: Experimental determination of P-V-T-X properties in the CO ₂ -H ₂ O system to 6 kb and 700°C	<i>S. Michael Sterner and Robert J. Bodnar</i>	1
Sulfate reduction and iron sulfide mineral formation in Gulf of Mexico anoxic sediments	<i>Saulwood Lin and John W. Morse</i>	55
The radiocarbon, $\delta^{13}\text{C}$, ^{210}Pb , and ^{137}Cs record in box cores from the continental margin of the Middle Atlantic Bight <i>N. Tanaka, K.K. Turekian, and D.M. Rye</i>		90

NUMBER 2

Paleohydrology of the Gulf of Mexico basin.....	<i>Wendy J. Harrison and Lori L. Summa</i>	109
Sulfate reduction in deep-sea sediments	<i>Donald E. Canfield</i>	177
Provenance of arkosic metasediments in the Virginia Blue Ridge: constraints on Appalachian suspect terrane models	<i>Stephen W. Kline</i>	189

NUMBER 3

- Porosity evolution and fluid flow in the basalts of the Skaergaard
magma-hydrothermal system, east Greenland
Craig E. Manning and Dennis K. Bird 201
- Constraints on the position of the Precambrian-Cambrian bound-
ary in the southern Appalachians*Dan Walker*
and Steven G. Driese 258
- Phanerozoic paleogeology*Gregg J.S. Bluth and Lee R. Kump* 284

NUMBER 4

Densities of liquids and vapors in boiling NaCl—H ₂ O solutions: a PVTx summary from 300° to 500°C	<i>James L. Bischoff</i>	309
A model for atmospheric CO ₂ over Phanerozoic time	<i>Robert A. Berner</i>	339
Carbon dioxide in the atmosphere: evidence from Cenozoic and Mesozoic paleosols	<i>Thure E. Cerling</i>	377
Phanerozoic denudation history of the Southern New England Appalachians from pressure data	<i>E-an Zen</i>	401

NUMBER 5

Latest Precambrian to Ordovician metamorphism in the Virginia Blue Ridge: origin of the contrasting Lovington and Pedlar basement terranes	<i>Nick H. Evans</i>	425
Determining the thermodynamic properties of solutes in crustal fluids	<i>John V. Walther</i>	453
The I/S-to-illite reaction in the late stage of diagenesis....	<i>B. Lanson and D. Champion</i>	473
On a reactive continuum representation of organic matter diagenesis.....	<i>Bernard P. Boudreau and Barry R. Ruddick</i>	507

NUMBER 6

Critical phenomena in hydrothermal systems: state, thermodynamic, electrostatic, and transport properties of H ₂ O in the critical region.....	<i>James W. Johnson and Denis Norton</i>	541
---	--	-----

NUMBER 7

- Dissolution and precipitation kinetics of kaolinite at 80°C and pH 3: the dependence on solution saturation state
K.L. Nagy, A.E. Blum, and A.C. Lasaga 649
- Brine evolution and mineral deposition in hydrologically open evaporite basins*Ward E. Sanford and Warren W. Wood* 687
- Nappes of Lower Cambrian strata in eastern Alabama: Talladega slate belt-foreland boundary redefined*Denny N. Bearce* 711

NUMBER 8

- Facies and structural contrasts across Bonne Bay cross-strike discontinuity, Western Newfoundland.....*Peter A. Cawood and Jack W. Botsford* 737
- Silurian cover, Late Precambrian-Early Ordovician basement, and the chronology of Silurian orogenesis in the Hermitage Flexure (Newfoundland Appalachians).....*B.H. O'Brien, S.J. O'Brien, and G.R. Dunning* 760
- Non-quadrilateral components in amphiboles: an example from metamorphosed iron-formation from the Ruby Mountains, Montana*Theodore C. Labotka and J.J. Papike* 800

NUMBER 9

- Fold-and-thrust belts in sedimentary rocks. Part 2: Other examples, especially variants*John Rodgers* 825
- Petrologic, structural, and geochronologic characteristics of the Acadian metamorphic overprint on the Taconian Zone in part of southwestern New England*W.E.Hames, R.J. Tracy, N.M. Ratcliffe, and J.F. Sutter* 887

REVIEW

- Women of Science: Righting the Record; edited by G. Kass-Simon and Patricia Farnes*H. C. W. Skinner* 914

NUMBER 10

P-T paths from zoned garnets: some minimal criteria <i>B. Ronald Frost and Robert J. Tracy</i>	917
Weathering of granitic tills and the genesis of a podzol ... <i>K.R. Law, H.W. Nesbitt, and F.J. Longstaffe</i>	940
Quartz solubility in hydrothermal seawater: an experimental study and equation describing quartz solubility for up to 0.5 M NaCl solutions..... <i>K.L. Von Damm, J.L. Bischoff, and R.J. Rosenbauer</i>	977
Index to Volume 291	1008
