

# CONTENTS TO VOLUME 295

## NUMBER 1

Solution to the <i>Hallopus</i> Enigma? <i>Jay Ague, Kenneth Carpenter, and John H. Ostrom</i>	1
Detrital zircon provenance of Cambrian to Triassic miogeoclinal and eugeoclinal strata in Nevada <i>George E. Gehrels and William R. Dickinson</i>	18
Origin of fibrosity and banding in agates from flood basalts <i>Yifeng Wang and Enrique Merino</i>	49
Iapetan rift-related turbidite-fan deposits from the central Appalachian Piedmont <i>David W. Valentino and Alexander E. Gates</i>	78
Paleomagnetic evidence for a Late Triassic age for transitional tholeiitic to alkalic disbase dikes from central Rhode Island <i>Suzanne A. McEnroe</i>	98

## NUMBER 2

- Interactions of mixed volatile-brine fluids in rocks of the southwestern footwall of the Duluth Complex, Minnesota: evidence from aqueous fluid inclusions  
*Jill Dill Pasteris, Teresa N. Harris, and David C. Sassani* 125
- Tectonic evolution of the Quebec-Maine Appalachians: from oceanic spreading to obduction and collision in the northern Appalachians  
*Nicolas Pinet and Alain Tremblay* 173
- The Taconic foredeep as sediment sink and sediment exporter: implications for the origin of the White Quartzite Blanket (Upper Ordovician-Lower Silurian) of the central and southern Appalachians  
*Joachim Dorsch and Steven G. Driese* 201

## NUMBER 3

- A chemical and thermodynamic model of dioctahedral 2:1 layer clay minerals in diagenetic processes: dehydration of dioctahedral aluminous smectite as a function of temperature and depth in sedimentary basins  
*Barbara Ransom and Harold C. Helgeson* 245
- Source of carbonate and origin of zonation in pyritiferous carbonate concretions: evaluation of a dynamic model  
*Max L. Coleman and Rob Raiswell* 282
- Isotopic and fluid inclusion studies of fluid movement along the Gavarnie Thrust, central Pyrenees: reaction fronts in carbonate mylonites  
*Andrew M. McCaig, David M. Wayne, Jim D. Marshall, Dave Banks, and Iain Henderson* 309

## NUMBER 4

- Genesis and dynamics of basin compartments and seals  
*P. Ortoleva, Z. Al-Shaieb, and J. Pucketts* 345
- U-Pb ages of metarhyolites of the Catoctin and Mount Rogers  
 Formations, central and southern Appalachians: evidence for  
 two pulses of Iapetan rifting  
*John N. Aleinikoff, Robert E. Zartman, Marianne Walter,  
 Douglas W. Rankin, Peter T. Lyttle, and William C. Burton* 428
- Lines of basement uplifts within the external parts of orogenic  
 belts  
*John Rodgers* 455

## REVIEW

- Pre-Mesozoic geology in the Alps; edited by J. G. von Raumer and  
 Frank Neubauer  
*John Rodgers* 488-

## NUMBER 5

- A. G. Högbom and the development of the concept of the geochemical carbon cycle  
*Robert A. Berner* 491
- Organic acids in hydrothermal solutions: standard molal thermodynamic properties of carboxylic acids and estimates of dissociation constants at high temperatures and pressures  
*Everett L. Shock* 496
- The formation of unconformity-type uranium ore deposits: 1. Coupled groundwater flow and heat transport modeling  
*Jeff P. Raffensperger and Grant Garven* 581

## NUMBER 6

- The formation of unconformity-type uranium ore deposits.  
2. Coupled hydrochemical modeling  
*Jeff P. Raffensperger and Grant Garven* 639
- Thermal history of rocks: P-T-t paths from geospeedometry, petrologic data, and inverse theory techniques  
*Antonio C. Lasaga and Jiang Jianxin* 697
- Abnormal pressures as hydrodynamic phenomena  
*C. E. Neuzil* 742

## NUMBER 7

- The Paleozoic world: continental flooding, hypsometry, and sea-level  
*Thomas J. Algeo and Kiril B. Sestlavinsky* 787
- The carbon-isotopic composition of Proterozoic carbonates: Riph-  
ean successions from northwestern Siberia (Anabar Massif,  
Turukhansk Uplift)  
*Andrew H. Knoll, Alan J. Kaufman, and Mikhail A. Semikhatov* 823
- Crustal magma generation and low-pressure high-temperature  
regional metamorphism in an extensional environment: pos-  
sible application to the Lachlan Belt, Australia  
*E-an Zen* 851
- Igneous petrogenesis and tectonic setting of plutonic and volcanic  
rocks of the Cordillera de Talamanca, Costa Rica—Panama,  
Central American Arc  
*Mark S. Drummond, Mark Bordelon, Jelle Z De Boer, Marc J. DeFant,  
Herve Bellon, and Mark D. Feigenson* 875

## NUMBER 8

- Calculation of the activity of  $\text{Al}_2\text{SiO}_5$ : applications to the  
geobarometry and geohygroscopy of garnet and  
staurolite zone metapelitic rocks  
*Edward D. Ghent and Timothy W. Grover* 923
- Progressive deformation and fracture patterns during foreland  
thrusting in the southern Appalachians  
*Gregory C. Ohlmacher and Atilla Aydin* 943
- Redetermination and reevaluation of compositional variations in  
metamorphosed sediments of the Littleton Formation, New  
Hampshire  
*Bill E. Moss, Larry A. Haskin, Robert F. Dymek, and Denis M. Shaw* 988

## COMMENT

- Mass transfer during Barrovian metamorphism  
*John V. Walther and Michael J. Holdaway* 1020
- Reply  
*Jay J. Ague* 1025

## NUMBER 9

- Mantle flow beneath the Pacific plate: evidence from seamount segments in the Hawaiian-Emperor chain  
*Phillip D. Ininger* 1035
- Oxygen isotope geochemistry of the  $\text{Al}_2\text{SiO}_5$  polymorphs  
*Z. D. Sharp* 1058
- Long-term control of atmospheric carbon dioxide: low-temperature seafloor alteration or terrestrial silicate-rock weathering?  
*Ken Caldeira* 1077
- Crystal chemistry of kaolinite and Fe-Mn oxides: relation with formation conditions of low temperature systems  
*Jean-Pierre Muller, Alain Manceau, Georges Calas, Thierry Allard, Philippe Ildefonse, and Jean-Louis Hazemann* 1115
- Genesis of agates in flood basalts: twisting of chalcedony fibers and trace-element geochemistry  
*Enrique Merino, Yifeng Wang, and Etienne Deloule* 1156
